

Steffen Eickhardt,

Steffen is currently the director of Biofilm Test Facility at the University of Copenhagen while finishing the final months of his PhD. He is an active part of the bio and med-tech entrepreneurial community in the greater Copenhagen area. His current research focus revolves around improving diagnostics and implementing animal models of chronic biofilm infections. He is an expert in the use of fluorescent microscopy and molecular biological methods on *ex vivo* patient and animal samples.

Steffen is currently involved in implementing several new diagnostic methods for chronic infections, imaging as well as molecular biology, at the university hospital of Copenhagen.
