

Leonard Witkamp, CV

Leonard Witkamp is a former dermatologist and director KSYOS, a hospital that delivers healthcare only by means of TeleMedicine. He has been recently appointed by the Royal Dutch Medical Association (KNMG) as Professor in TeleMedicine at the Academic Medical Centre in Amsterdam. KSYOS develops, investigates and implements TeleMedicine services that add to efficiency increase of the primary healthcare process. KSYOS works together with a network of over 7.000 healthcare workers in TeleDiagnosis, TeleConsultation and TeleMonitoring in various countries seeing over 120.000 patients yearly.

Leonard Witkamp will address various factors that determine the success of your TeleMedicine business case focussed on TeleWond Monitoring. He will address how you can influence these factors in four phases: development, usability, efficiency and scaling phase. In his talk, he will address the business case for society as well of the businesscase of the stakeholder, those involved in the TeleMedicine process.
